The Way to Play in a Digital World

Conferences: April 5–10, 2014 | Exhibits: April 7–10 | Las Vegas Convention Center, Las Vegas, Nevada USA

# AES67-2013 Standard for audio applications of networks:

## High-performance streaming audioover-IP interoperability

published on September, 11th, 2013

Andreas Hildebrand, Senior Product Manager ALC NetworX GmbH, Munich

A. Hildebrand: AES67 & beyond Broadcast Engineering Conference, Apr. 6<sup>th</sup>, NAB 2014

#### Scope:

• Interoperability guidelines for professional, low-latency audio over campus and local area IP networks using **existing** protocols wherever possible.

Justification:

- Recent generation of networked audio technology uses a diversity of proprietary and standard protocols
- Despite a common basis in IP, none of the systems were interoperable.
- The latest crop of networking technology has not yet reached a level of maturity precluding changes to improve interoperability.

## Existing Audio-over-IP solutions / technologies / initiatives:

Technology	Purveyor	Date introduced	Synchronization	Transport
Livewire	Telos/Axia	2003	Proprietary	RTP
Wheatnet-IP	Wheatstone	2005	Proprietary	RTP
Dante	Audinate	2006	IEEE 1588-2002	UDP
N/ACIP	EBU	2007	Adaptive (per stream)	RTP
Q-LAN	QSC Audio Products	2009	IEEE 1588-2002	UDP
	ALC NetworX	2010	IEEE 1588-2008	RTP
AVB	IEEE, AVnu	2011	IEEE 802.1AS	Ethernet, RTP

**CHANNEL OPP** A. Hildebrand: AES67 & beyond

Broadcast Engineering Conference, Apr. 6th, NAB 2014

 $\triangleright$ 

#### TG Work:

- AES Task Group X192 initiated late 2010
- Task Group Leader: Kevin Gross, AVA Networks, Boulder, CO.
- Members:
  - ~ 100 experts from the professional audio community
  - manufacturers, system architects, consultants, professional end users
  - US / Canada, Europe (+ South Africa, South America, Australia)
- Main contributors: ALC NetworX, Axia, QSC, Wheatstone, Nine Tiles, BBC, SR, Clair Brothers, ...
- Bi-weekly web conferences & several F2F meetings
- Standard published on September, 11<sup>th</sup>, 2013

AES67 technology components:

- Synchronization: IEEE 1588-2008, default profile (media profile suggested)
- local media clock generation

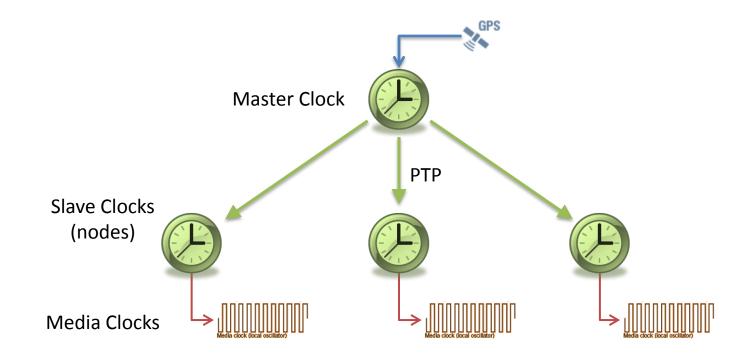

AES67 technology components

CHANNEL OP

- time synch & media clock generation:

A. Hildebrand: AES67 & beyond

# 7

Broadcast Engineering Conference, Apr. 6<sup>th</sup>, NAB 2014

AES67 technology components:

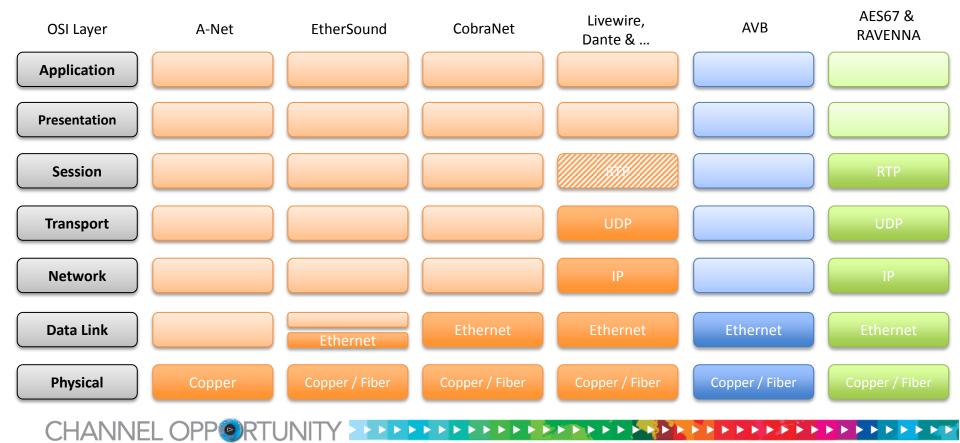

- Synchronization: IEEE 1588-2008, default profile (media profile suggested)
- local media clock generation
- Network: IPv4 (IPv6), unicast / multicast & IGMPv2
- Transport: RTP/AVC (RFC 3550 & 3551) / UDP / IP

## Selected solutions / technologies compared to OSI layer model:

A. Hildebrand: AES67 & beyond

Broadcast Engineering Conference, Apr. 6th, NAB 2014

#9

#### AES67 technology components:

- Synchronization: IEEE 1588-2008, default profile (media profile suggested)
- local media clock generation
- Network: IPv4 (IPv6), unicast / multicast & IGMPv2
- Transport: RTP/AVC (RFC 3550 & 3551) / UDP / IP
- Encoding: 16 / 24 bit linear, 48 (44.1 / 96) kHz, channel count: 1..8
- Packet Setup: 48 samples (6 / 12 / 16 / 192), max. payload size: 1440 bytes
- Quality of service: DiffServ w/ 3 suggested traffic classes (DSCP)
- **Connection management**: SDP (dependency on *draft-ietf-avtcore-clksrc*), SIP (unicast)
- **Discovery**: excluded, but several recommendations given (i.e. ZeroConf, SAP and others)

#### Applications:

- Commercial audio applications:
  - Installed sound: theaters, stadiums, theme parks, cruise ships
  - Live sound (fixed and touring)
- Professional broadcast
  - In-house distribution
  - Inter-facility links on corporate networks
  - OB vans
- Music production
- Post-production

## AES67 – the "O negative" of audio networking

(Roland Hemming, Independent Audio Consultant)

& beyond Broadcast Engineering Conference, Apr. 6<sup>th</sup>, NAB 2014 # 12

A. Hildebrand: AES67 & beyond Broadcast Engineering Conference, Apr. 6<sup>th</sup>, NAB 2014 # 13

## AES67 – the "O negative" of audio networking

When will it be available?

A. Hildebrand: AES67 & beyond Broadcast Engineering Conference, Apr. 6<sup>th</sup>, NAB 2014 # 14

## AES67 compliant technologies / solutions:

CHANNEL OPP

Technology	AES67 support	Comment
	yes	Full support through operational profiles (Generic Profile covers most mandatory requirements)
Livewire	Yes (no)	Livewire "new": yes (→ RAVENNA) Livewire "legacy": no, but technology bridging possible
Q-LAN	announced for next fw version	Requires some protocol & packetization adaption
Dante Wheatstone	"within 12 month" ?	Depends on company strategy, modifications required (synchronization & transport)
N/ACIP	(no)	ACIP2 working on extensions for limited stream exchange
AVB	(no)	AVB devices may use gPTP, but need to add layer 3 transport

A. Hildebrand: AES67 & beyond Broadcast Engineering Conference, Apr. 6<sup>th</sup>, NAB 2014

# 21

## AES67 – the "O negative" of audio networking

When will it be available?

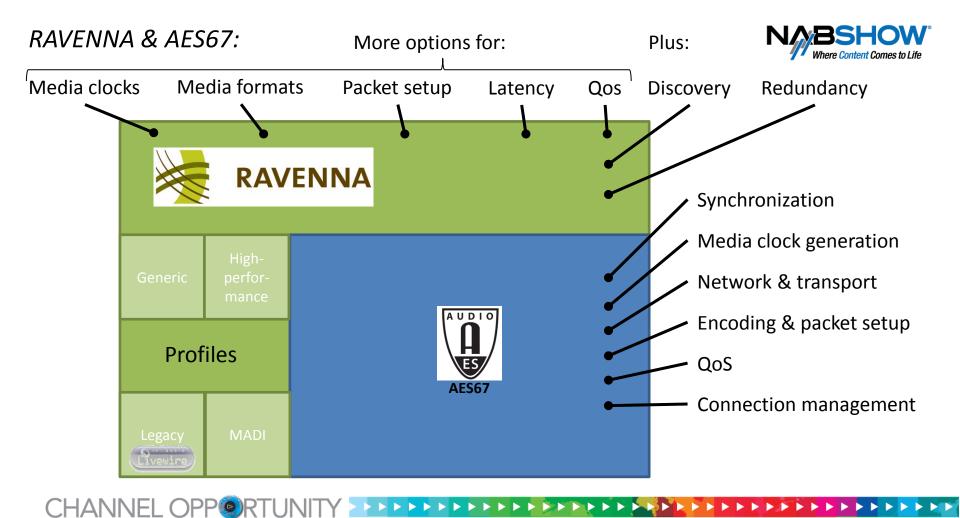

## An "Open Technology" platform:

- Based on technology publicly available
  - ⇒ No proprietary "black box" design
- Utilizes standard protocols
  - ⇒ Proven technology, widely supported
- Designed to work on **existing networks** 
  - ⇒ No new network equipment required
- No proprietary licensing policy
  - ⇒ No cost per channel, suits all performance needs

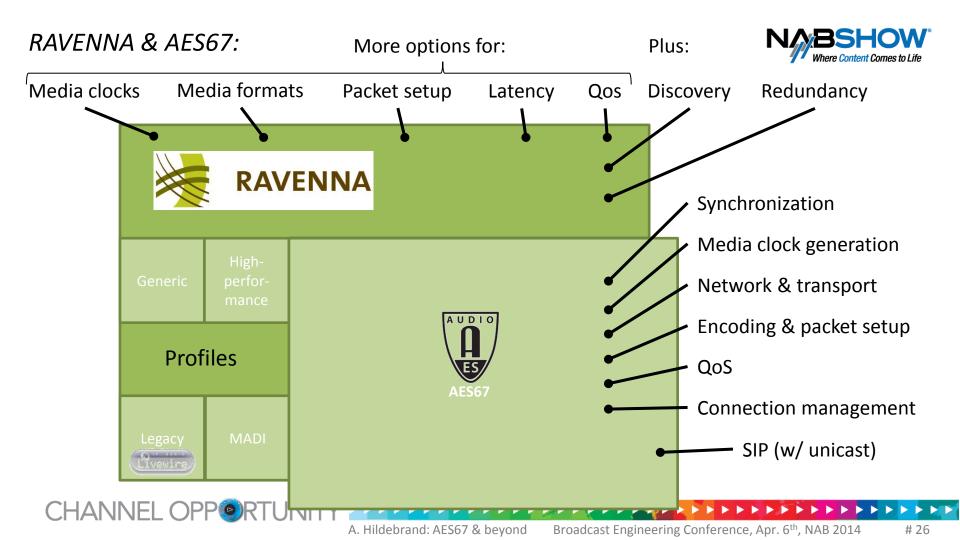

- Draft on operating principles **published** since June 10<sup>th</sup>, 2011
  - Anybody can implement / support RAVENNA technology
- Supported by renowned companies from the ProAudio industry
  - ⇒ Broad market acceptance
- Active participation in AES X192 standardization TG
  - ⇒ RAVENNA supports AES67 standard

A. Hildebrand: AES67 & beyond Broadcast Engineering Conference, Apr. 6<sup>th</sup>, NAB 2014 # 24

A. Hildebrand: AES67 & beyond Broadcast Engineering Conference, Apr. 6<sup>th</sup>, NAB 2014

# 25

#### What is **RAVENNA**?

**RAVENNA Draft on Operational Principles** 

CHANNEL OP

#27

A. Hildebrand: AES67 & beyond

20 ml PTPv2 500 g RTP 1 pkt multicast 1 pinch of Bonjour

Ingredients:

#### Cooking order:

1. Stew PTP to order

2. Add RTP

- 3. Mingle with multicast
- 4. Add Bonjour on top

Broadcast Engineering Conference, Apr. 6th, NAB 2014

Serve hot and Enjoy!

## Beyond?!

AES TG SC-02-12-M: AES67 Development

- Outlining AES67 compliance test guidelines
- Specifying and engineering the compliance tests
- Planning and organizing plug-fests
- Improving the standard specification where necessary
- Participants:

- anyone implementing AES67
- parties / individuals with strong interest in AES67 interoperability

## **Questions?**
